# About The 3 Rocks

A family mining business, passed down through generations, combines traditional methods with modern techniques. This enduring enterprise adapts to technological and market changes while preserving inherited practices and values.

## Structure and Management:

The mine is family-owned, with each member contributing based on experience and skills. Three heads of the last generation manage operations, making key decisions collectively.

## Generational Transition:

Management passes from one generation to the next, maintaining traditional values while encouraging innovation.

**Extraction Methods:** Honoring ancestors, the mine uses some traditional techniques and tools alongside advanced machinery like excavators and modern drills to enhance efficiency and safety.

## Diversification:

Beyond extraction, the family invests in sectors like mining tourism, offering guided tours to educate the public about mining history and processes.

## Marketing and Distribution:

Products are sold locally and internationally, supported by strong relationships with buyers and distributors. The mine is renowned for quality, reliability, and excellence.

## Challenges and Future:

Facing fluctuating mineral prices, regulations, and climate changes, the family plans long-term. They aim to integrate emerging technologies, expand into new markets, and train future generations.

**Zakariae HAMEDOUN**

**Badr GADI**

# LEAD

Our high-quality lead offers exceptional purity and durability, making it perfect for various industrial and commercial applications. With rigorous manufacturing and strict quality control, we ensure our lead meets the highest industry standards. Trust our expertise and commitment to provide the superior lead you need for your projects.

## alaatariya

86% of pure Plomo

## Bermil

More than 60%

## Darsa

More than 60%

---

NB: We can offer 100 tons each month.

# Our stock

JUNE 2024

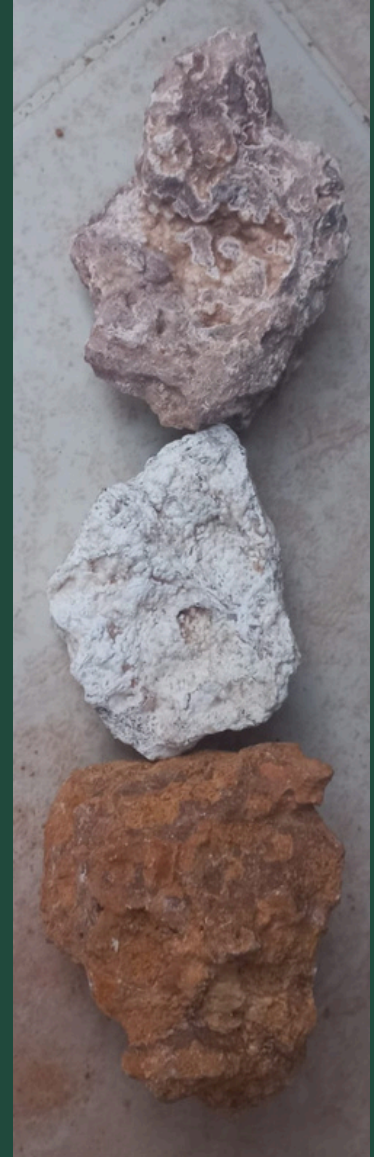

| Plomo declinaision | Pureness  | Quantity |
|--------------------|-----------|----------|
| alaatariya         | 86%       | 400 Tons |
| Bermil             | 74%       | 200 Tons |
| Darsa              | 80%       | 100 Tons |
| Lead               | 30% - 45% | 300 Tons |

## ZINC

Our high-quality zinc calamine offers exceptional purity and reliability, making it ideal for various industrial and commercial applications. With meticulous production and stringent quality control, we ensure our zinc calamine meets the highest industry standards. Trust our expertise to provide the superior zinc calamine you need for your projects

## OUR STOCK

| Zinc     | Pureness | Quantity |
|----------|----------|----------|
| Calamine | 37%      | 80 Tons  |
| Fel four | +70%     | 45 Tons  |

# Barite

Our Barite(Barytine ) is renowned for its high quality and purity, making it indispensable for a wide range of industrial applications. With rigorous sourcing and manufacturing processes, we ensure that our Barytine meets stringent industry standards. Whether used in drilling fluids, paints, or pharmaceuticals, our Barytine delivers consistent performance and reliability.

## OUR STOCK

| Barite | dansity     | Quantity |
|--------|-------------|----------|
| Borite | 4.18 - 4.28 | 400 Tons |

# Iron

Our iron is distinguished by its superior quality and adaptability, essential for a wide array of industrial uses. With rigorous quality control from sourcing to production, we guarantee that our iron meets the most rigorous industry standards. Whether utilized in construction, manufacturing, or infrastructure development, our iron consistently demonstrates durability and reliability.

## OUR STOCK

| Iron | Pureness | Quantity   |
|------|----------|------------|
| Iron | 73%      | 40000 Tons |
